

CENTER FOR ANATOMY AND CELL BIOLOGY
MEDICAL UNIVERSITY OF VIENNA

MASTER STUDENT

A newly established research group at the Center for Anatomy and Cell Biology at the Medical University of Vienna ([Group Wossidlo](#)) working on understanding epigenetic processes in early development and stem cell biology is looking for a Master Student.

This opening is for a Master Student who wants to gain hands-on experience in analyzing and manipulating epigenetic reprogramming events in stem cells and early mammalian embryos.

The successful applicant will be trained in basic techniques of stem cell biology and will be involved in the design of novel tools for regenerative medicine and stem cell biology.

Applicants should hold a bachelor's degree in biology, genetics or a related discipline. We are looking for enthusiastic scientists with proficient communication skills, who are good team players. Previous experiences with stem cells, molecular cloning, flow cytometry and/or sequencing techniques are advantageous.

If you are interested in this position, please send a CV, contact details of two referees and a letter of motivation describing your interest in this research and past research experiences to **Mark Wossidlo**.
